

The Poly AG Range

Above Ground Water Pumping Station

Product Overview

The POLY AG package pump station is designed to collect and pump water from an above ground system and is available in a single or twin pump arrangement.

The POLY AG can collect grey water from showers and wash-hand basins and is not suitable for foul/sewage waste from toilets. If this is required, please see our POLYAG Mini Series pump station range.

The POLY AG is delivered to site as a complete package, including all internal pipework and the drainage pump.

The POLY AG is specially designed to ensure an easy, problem-free installation and is manufactured in high grade MDPE. We recommend that a high level alarm is fitted, this is available as an additional extra.

We can also supply a battery back-up which would ensure the pump(s) would operate in the event of a mains power outage.

As the system is being installed above ground, you need to check your levels ensure you can achieve a gravity fall into the chamber.

Typical Application

The POLY AG is specifically designed for above ground application for the collection and pumping of any water. Any liquid collected can contain solids up to 10mm only. the Aquatank AG is perfect for:

- ▶ Residential
- ▶ Commercial
- ▶ Industrial
- ▶ Office and Professional Spaces

Additional Extra Components

The POLY AG package pump station can also come with a range of extras and accessories which are recommended with each station, these are: -

- ▶ High level alarm
- ▶ Telemetry alerts
- ▶ Battery backup
