

Tea point package Single zone water leak detection system

PACKAGE INCLUDES:

Leak-Stop Alarm Panel
3m of connection cable
3m of sensor tape
5 x floor clips
15mm Solenoid valve
10m valve connection cable
2m mains fly lead
BMS Connection

WHAT DOES IT DO? (Everything required ((beyond the fused spur)) to protect a tea point is included in this package).

This is a complete system designed to be installed in Tea Points to protect areas around and under them. It is an easy to install system that uses a 3m sensor tape positioned under the kick boards, held in place with floor clips. Should water touch the tape at any point, the alarm will trigger. It has a relay connection to a valve that will switch off the water immediately a leak occurs, as well as a volt free relay for connecting to the BMS.

Typical Office Tea Point
