

AQUATANK PRO

Basement Dewatering System

The **AquaTank Pro** package pump station is designed to collect ground water via a perimeter channel or 110mm pipe and/or clear opening to the top of the chamber. The **AquaTank Pro** comes with a twin pump arrangement, this gives peace of mind, knowing that you always have a backup pump. For further peace of mind we can supply a battery backup, this would ensure the pump would work in a power outage.

The **AquaTank Pro** can also collect grey water from showers and wash-hand basins, but is not suitable for foul water from a W.C. (please see our AquaTank Foul package pump station). The **AquaTank Pro** is delivered to site as a complete package, including all internal pipe work and drainage pumps. We would highly recommend that a high level alarm is fitted. The **AquaTank Pro** has been designed to ensure an easy problem free installation and is manufactured in high grade MDPE.

The **AquaTank Pro** comes in three different sizes, 635, 1000, and 1500 mm deep.

Features

- 2 x DPT drainer 01 or 02
- MDPE chamber 0.61MØ x 0.635M deep (190L)
- 1¼" Internal pipe work
- 1¼" Non-return valve
- 1¼" Quick release coupling
- 40mm Cable duct

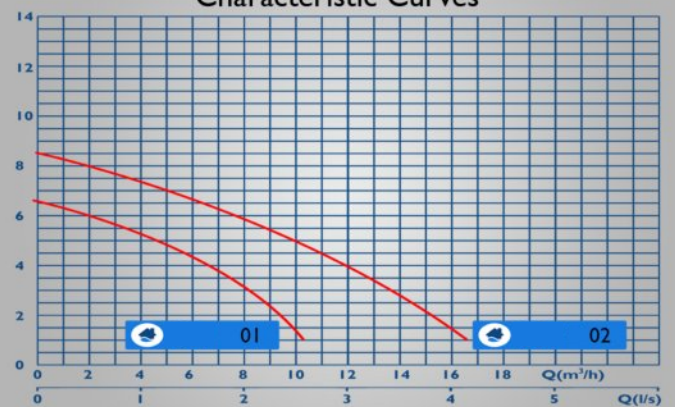

Specifications

Pump Model	DPT 01/02
Voltage	230V
KW Rating	0.40kw / 0.75kw
Full Load Current	1.9a
Fuse Rating Spur	2 x 10 amp
Typical Duty	2.2LS / 3M Head
Chamber Storage	190L

- Specifically designed for ground water applications
- Simple to install
- Quiet in operation
- Various depths available
